

### General Information:

Please use the Web Portal Contraception and Sexual Health Access to make claims for patients who qualify for this service.

### Programme Objectives:

- To remove social and financial barriers to accessing contraceptive services and sexual health checks for young people, this includes clinician consult and Rx fees.
- To enable a wide range of access points to sexual health services.
- To ensure that the service is acceptable to young Māori.
- To increase equity of access to contraception in general practice for low-income women and those living in deprivation.
- To reduce poor health and social outcomes for women and infants associated with unplanned pregnancy and birth.
- Provide more women with support for their decision making about their fertility and when to have children.

### Eligibility Criteria:

1. Anyone under the age of 25 years.
2. Any women 25 years and older who:
  - a) are enrolled in a West Coast general practice and
  - b) live in quintile 5 areas; **or**
  - c) hold a community services card; **or**
  - d) are high risk of an unplanned pregnancy and poor health and social outcomes, such as:
    - i. Māori, Pacific
    - ii. disability service users
    - iii. Oranga Tamariki residential or foster care
    - iv. users of Community Alcohol and Drug services
    - v. users of Residential or Community Mental Health services
    - vi. high users of maternity services
    - vii. exceptions on a case-by-case basis

### Programme processes:

#### Under 25-year olds:

- The practice will endeavour to make their services youth-friendly (see the RNZCGP Assessment tool for youth friendly primary care for helpful suggestions).
- The practice will deliver a service that is acceptable to young Māori.

## Practice Information

Last updated: Jan 2024

- Services may be provided to enrolled or casual patients, with the exception of subdermal or IUD devices which are only available to enrolled patients through this programme.
- Only one claim may be made per visit. A separate claim for an STI check and a contraception service cannot be made on the same day for the same patient.

### High Need women ≥25 years of age:

- Contraception services, including subdermal, or IUD devices, may be provided to enrolled patients only. The service does not cover STI consultations or repeat follow up prescriptions or consultations.

### Both groups:

- Services may be provided by general practitioners or nurses, with each practice determining which practitioner will provide each service.
- Visits for subdermal or IUD procedure (insertion, removal and/or replacement) are firstly made for a consult and the subsequent visit paid at the procedure rate. Co-pay must be requested with this initial consultation for people over the age of 25 years
- For all prescriptions issued, please ensure the script is stamped or marked with the "West Coast Health Contraception Programme" to ensure they do not incur Rx fees at the pharmacy. This includes scripts for condoms.
